Here is my take.

I was given three products free as part of a product review. I was given the [Original Sprout's natural shampoo](#), [Scrumptious Baby Cream](#), and [Miracle Detangler](#). I have been personally using the Miracle Detangler the most lately. It has a nice fresh smell to it and has helped calm down that frizz I tend to get. I have been doing the normal shampoo and then towel drying my hair and then applying the detangler. It leaves the hair smelling good and making it easy to comb through. The baby cream is nice as well because it leaves the skin both soft and silky keeping it hydrated all day long. I love the Original Sprout's products as they are Biodegradable, Gluten/Soy/and Nano particle free, along with being just overall intended for dry sensitive skins. They are made with Natural & Organic Ingredients. I was reading and I saw on the shampoo one that it contains Organic Rosemary to Help Repel Lice & Insects, how great is that. I do not know about you but during a child's time through school they are exposed to all of that and once you get lice it is hard to get rid of it sometimes. These products are defiantly worth every penny. Do you like products that are Natural? If so Check these products out.
