Original Sprout ~ Scrumptious Baby Cream

By METSV · March 9, 2011 · 0 Comments · 18 Views

Our Scrumptious Baby Cream is irresistible, the whole family loves it! Not a sunscreen, but a **soothing protective barrier that keeps skin soft & smooth as velvet**. Our multi-benefit cream is infused with **Natural Zinc for Added Sun Protection** plus organic rosemary, helping to repel insects & calm sensitive skin. Non-greasy & extra hydrating for every skin type. \$19.95 at originalsprout.com

METSV says: Addicted. Do you know that everyone and anyone who comes to my house gets a "you gotta try this" from me? I put a little on their hand and of course the first thing they do is inhale it (EVERY one of them goes "ummmm.....smells sooooooo good") then they massage it in and their hands become powdery soft. I'm not kidding. This cream is so not just for wee ones - as a matter of fact, even if I still HAD wee ones floating around my house I'd have a tough time sharing this cream with them. The scent alone had me at hello - sweet, soft, cottony-powdery - yes, it does remind me of all things baby - BUT...the scent is such that it just WORKS for big girls too...(and guys if they are so inclined)...Original Sprout is the real deal when it comes to its pureness - 100% Vegan with absolutely nothing that will harm or strip yours or your baby's sensitive skin. I easily get rashes and reactive skin from products that are too harsh - especially in the winter when my skin is more likely to be dry and irritated - this baby cream truly keeps my skin soft, healthy, and hydrated - not one bit of irritation. The absolute perfect gift for mommies...and babies! Scrumptious indeed! Love.
