## Original Sprout | haircare + body products for kids

words\_jill tiernan

Original Sprout first had us at ["Miracle Detangler."](#) And we've been smitten ever since. Designed for—but certainly not limited to—babies, kids and the tween set, my daughter's smooth as silk curly little locks are proof that this brand really knows how to bottle magic. A big added bonus: their products are natural, organic and free of sulfates, parabens, soy and keratin. I recently sampled an array of their items on both of my girls and the stand outs are:

**Tahitian Hair Oil:** A non-greasy oil is hard to find and this one delivers on its promise. Part of Original Sprout's [TahitianCollection](#), the Tahitian Hair oil works wonders from head to toe. We especially like it for soothing dry hands and feet. It also adds shine to any hairstyle.

**Natural Shampoo:** How do we love thee? Let's count the ways. It eliminates frizz, it's tear free, boasts added sun protection *and* I can now brush my daughter's hair thoroughly in one second flat—a huge time saver.

**Scrumptious Baby Cream:** Infused with natural zinc for added sun protection, this is a great base coat prior to applying SPF. The super-hydrating formula and succulent aroma leaves your bebe looking and smelling delish. It's an absolutely, positively yummy way to start or end your day.
