Original Sprout Review & Giveaway

10:16 PM |

Posted by Tatum

We are a family-run company located in San Luis Obispo, CA. Our products are out-selling other brands in health food stores and we know your family will love them! Once sampled, adults and children are completely hooked. That's why we have a cult following of the who's who in green Hollywood, thousands of children's salons, and mothers who want high-quality, safe products.

PRODUCT HISTORY:

Our founder delighted in her newborn daughter's thick hair. Wanting to use the safest bath products led to her trying natural baby shampoos. To her surprise, all the shampoos reeked havoc her daughter's hair and sensitive skin. To remedy the problem Inga created the first of it's kind, ultra moisturizing natural baby bath & styling products. The benefits of being a master stylist with professional experience & a mother with real life experience culminated into Original Sprout, a globally trusted natural family brand.

WORRY-FREE FRAGRANCES:

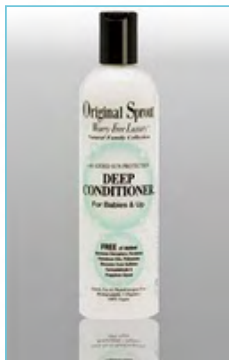

Essential oils & perfumes commonly contain skin penetrating estrogen disrupters. Because of this Original Sprout has non estrogenic fragrances created, so smelling good is worry-free! Our fragrances are free of ingredients linked to cancer concerns such as citrus oils, phthalates, formaldehyde, acetaldehyde, styrene toluene, chlorobenzene, glycol ethers & musk.

ENVIRONMENT:

Original Sprout is environmentally responsible. Company cars run on biodiesel and recycling is standard. Recycled shipping boxes are commonly used and skylights are in the fulfillment center for reduced energy consumption. Recyclable number two plastic is used in product production, for added consumer and environmental protection. Original Sprout will continue to strive to implement the latest technology in alternative energy, which directly contributes to cleaner air, water and a better future for our children.

The first thing I did when I received my package from [Original Sprout](#) is twist off the cap & smelled the [shampoo](#). The scent was heavenly & it is the best smelling shampoo

I have ever smelled. Tim even agreed with me on the smell & we like totally different scents. The scent was light & not overwhelming after I washed my hair.

When I washed my hair with the [shampoo](#) I noticed that it didn't have a huge lather. It did lather but not like some other shampoos that take forever to rinse out. The [conditioner](#) also has a really pleasant smell & was thick not runny. I love conditioners that are thick & stay in wet hair instead of running out. Where I live the water is extremely hard & dries out my hair & skin.

The [Body Wash](#) also had the same great scent. It was almost a runny consistency & I expected to have a hard time lathering it up. This lead to me using a bit too much & had to rinse out my scrubby for 2 minutes. I underestimated the strength of the body wash. One thing I noticed & absolutely loved was that there was no filmy feeling during or after use. With some other body washes my skin is instantly dried out after use. This wash left my skin feeling really soft.

Original Sprout also carries a nice selection of [Styling Products](#) such as Natural Hair Gel & Detangler. Also carried are items such as Cradle Cap Kit, Swimmers Kits & Eczema Kit.
